15th May 2018**

**West Oxford Community Centre
Botley Road, OX2 0BT**

There is limited parking at the Centre but it is easily accessible by bus and train.

The Changing Face of General Practice

An exchange of information and views between health care professionals and patients

Oxford City PPG Forum invites patients to a meeting to discuss how general practice is changing. This session will provide information on the challenges facing general practice, and some of the ideas that are being considered in Oxford to ensure that patient care is not compromised.

The roles of different health care professionals will be explored, and delegates will be asked to consider how they could contribute to these changes. Delegates will hear from, and be able to speak to local GPs, health service managers, and others providing services in Oxford.

The potential changes will be discussed from a patient perspective.

If you are interested in coming along please contact Nicola Perrett to reserve a place. Nicola.perrett@healthwatchoxfordshire.co.uk. If you do not have access to email please call Healthwatch Oxfordshire on 01865 520520 and leave a message for Nicola.

The Oxford City PPG Forum is supported by Oxfordshire Clinical Commissioning Group, and is made up of volunteers who chair, or participate in, the Patient Participation Groups of the Oxford City General Practices.

PROGRAMME

- 12.45 Registration & tea/coffee (sorry but we are not able to provide lunch.)
- 1.00 Welcome from the Chair
Tracey Rees, PPG Chair, The Manor Surgery
- 1.10 The challenges facing general practice and what's changing in Oxford
*Dr David Chapman, Clinical Director, Oxford City Locality
OxFed – our local GP Federation*
- 1.30 Table Group Work 1 – *The roles of others*
- Using patient scenarios groups will consider the potential role of other health care professionals to play a part in their care.
Each table will have at least one health care person.
- 2.15 Refreshment break and chance to network and look at displays
- 2.45 Table Group Work 2 – *The roles of Patient Groups in Oxford*
- What has already changed in our own practices – is it working?
How is it affecting patients (do we actually know?)
What do you think of some of the projects that will operate across the City and how can we provide feedback?
- 3.30 Discussion on the issues arising from what we have heard, and what action will be taken (not death by feedback).
Dr Kiren Collinson, Clinical Chair of Oxfordshire Clinical Commissioning Group will facilitate this session
- 4.00 Wrap up and close
